

Training Objectives

- ★ Select and implement Lean tools - Green or Black Belt level
- ★ Produce a summary report on the work carried out and the deployment of the Lean approach
- ★ Implement a progress plan and verify the sustainability of actions (gains > 100K€ if Black Belt)

Teaching methods: 100% distance learning - 3 hours of coaching (in the case of a field project)

Evaluation & success : Certification of Green or Black Belt skills via presentation of a summary report to a panel of judges from the University of Lean 6Sigma (UL6S) or completion of a case study.

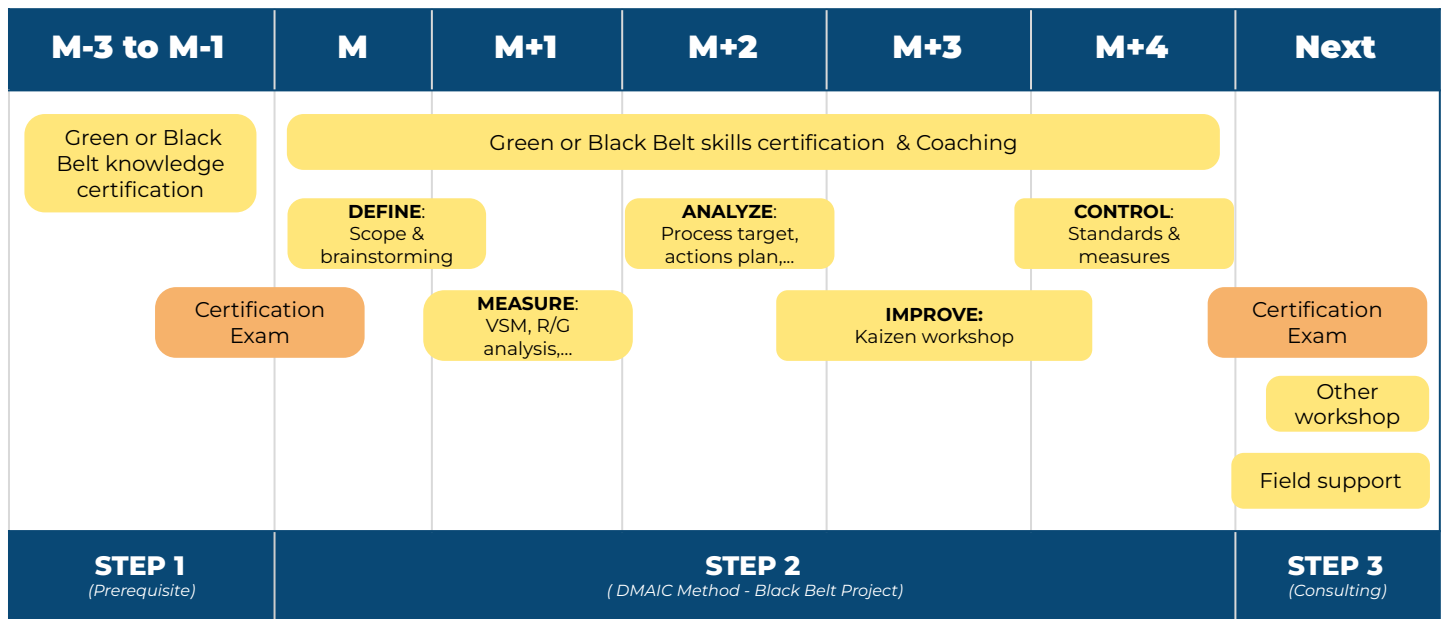

Prerequisite : Green or Black Belt knowledge certification (minimum score of 600/1000 pts).

Accessibility : Accessible to people with disabilities. Contact us so to adapt your training.

**Field Project
3 hours coaching**

1,250€

Coaching **3 hours**

Step 1: Green or Black Belt Knowledge certification

Step 2 : Coaching and personalized support (3h)

“Define” and “Measure” phases (1h)

Choose your scope and objectives. Choose the right diagnostic tool.

Deliverables : Project sheet (A3), risk analysis and project team.

“Measure” and “Analyze” phases (1h)

Map current performance. Define target process and action plan.

Deliverables : VSM or flowchart type process mapping, red-green analysis, SIPOC Target mapping, target organization, gain/effort matrix

“Improve” and “Control” phases (1h)

Implement actions on the ground + support for changes. Verify the achievement of the objectives and the implementation of the standards. Preparation of jury support

Deliverables: Field actions (Kaizen realization), follow-up of the action plan. Pictures of achievements, writing of standards and next steps

Step 3 (optional) : days of field support

Days with a consultant in the field according to your project (tailor-made)
